## **VIRTUAL DRUPA 2021, AN UNUSUAL EVENT**

After a year disrupted by the health crisis and an event postponed and then cancelled, the 2021 edition of DRUPA will finally be held online, from 20 to 23 April 2021! This means that participants will be able to attend this event anywhere in the world.

Throughout the virtual show, RISO's new content will be presented, offering the opportunity to discover innovative solutions that add value to the production printing industry. During these 4 days, it will also be possible to make an appointment with a RISO expert, a privileged moment for printing professionals who will be able to exchange on their expectations and needs in order to improve their daily life with perfectly adapted solutions.

### **RISO SPECIAL LIVE SESSION APRIL 21 AT 11:20 !**

**On April 21 at 11:20 am**, participants will be able to watch a live demonstration of the VALEZUS T2100, followed by a round of questions and answers. A real opportunity to get all the information on this innovation!

## **RISO SOLUTIONS, AT THE HEART OF INNOVATION**

Unique production printing solutions will be presented, all designed with a common technology: the **FORCEJET™** inkjet process.

- As a major technological innovation, the **VALEZUS T2100** combines the economy of inkjet printing with the flexibility of a high-speed digital sheet-fed press, up to **320 ppm in duplex**.
- The **ComColor GD series** was specifically designed for production printing and can achieve speeds of up to 160 ppm. A 5th gray color in addition to the CMYK inks has been added to guarantee an optimal black and color rendering.
- The new **ComColor FT series**, launched earlier this year, offers many advantages, including productivity, autonomy, print quality and flexibility thanks to advanced performance accessories. It is extremely compact and fits into any environment while achieving high speeds of up to 140 pages per minute.

### **ABOUT RISO**

Founded in 1946, the Japanese RISO KAGAKU Corporation designs, manufactures and markets production printing systems. RISO FRANCE is the group's largest subsidiary and ensures the marketing of RISO's products in France as well as in the Benelux countries and Western Switzerland, French-speaking Africa and the Middle East.
